Reading with a question

A short sample paper for Interleaf

1. Start with a question

Before reading, describe the question you want to answer.

Use the outline to inspect the structure of the argument.

Select a sentence to save a highlight or ask for an explanation.

A claim is not the same as evidence.

Record the assumptions that connect evidence to conclusions.

Return to the original text when an interpretation is uncertain.

Evidence and interpretation

2. Keep useful notes

Separate quotations, interpretations, and open questions.

Preserve the source location so each note can be checked.

A bookmark records where you want to return.

This sample contains selectable text and a PDF outline.

It is original test content, not a published research paper.
